*Alu*

The SUBLITEX technology applied to decorate aluminium. DecotransAlu is a sublimable dye printing, high-definition polyester film. The film can give a wood effect or "decorative finishes".

Originally developed to decorate alu window or doorframes, the film can be used in a variety of applications across the Construction and Architecture universe: doors, windows, kitchen elements and interior decoration.

Plus:

- Outdoor performances
- High-definition
- Maintenance free
- Easy application
- Sustainable production process

DecotransAlu dyes penetrate permanently into powder coated aluminium and metal, giving the characteristics of upper-edge weatherproof attributes and resistance to wear and tear over time.

Newly developed **HR** range is the latest upgrade to the Decotrans family with highly improved UV stability.
